```javascript
//Create empty object called addressBook
const addressBook = {};

//Create three separate objects to represent people's information
const person1 = {
  firstName: "Jacob",
  lastName: "Jacobs",
  email: "jacobJacobs@gmail.com",
  phone: "123-123-1234"
};

const person2 = {
  firstName: "Jay",
  lastName: "Johns",
  email: "Jay.Johns@gmail.com",
  phone: "999-999-9999"
};

const person3 = {
  firstName: "King",
  lastName: "Bob",
  email: "King.Bob@gmail.com",
  phone: "515-971-1864"
};

//Add these 3 people to address book
addressBook.person1 = person1;
addressBook.person2 = person2;
addressBook.person3 = person3;

//Display address book
console.log(addressBook);
```

▼ Object ⓘ
  ▶ person1: {firstName: 'Jacob', lastName: 'Jacobs', email: 'jacobJacobs@gmail.com', phone: '123-123-1234'}
  ▶ person2: {firstName: 'Jay', lastName: 'Johns', email: 'Jay.Johns@gmail.com', phone: '999-999-9999'}
  ▶ person3: {firstName: 'King', lastName: 'Bob', email: 'King.Bob@gmail.com', phone: '515-971-1864'}
  ▶ [[Prototype]]: Object
